	Monthly Ladder Inspection		

Job Number: _____

Inspection of all ladders should visually determine the following:

1. Rung and side rails free of defects.
2. Side rails free of sharp edges.
3. Joints between rugs and rails tight.
4. Rungs free of oil and grease.
5. Safety shoes (feet) in good condition.
6. Hardware and fittings securely attached and in good operating condition.
7. Ladder properly identified.
8. Extension ladders must have a safety catch to lock the position of extension.
9. Non-conducting ladders used when performing electrical work.

Verify all items of the above ladder inspection checklist are either satisfactory or unsatisfactory by marking S or U in the appropriate columns.

Ladder Id	Size	Foot Pads	Rung/Steps	Risers	Spreader Braces	Comments

If any item is marked unsatisfactory, remove the item from service and destroy.

If it does not pass inspection indicate the Date Destroyed: _____ ☐ N/A

Name (print): _____ Date: _____

Signature: _____
