

Manual Section 6	Issue Date 03/17/10	Revision Date 01/15/26	Policy Number LLCP-052
	<b>Spill Prevention &amp; Response</b>		

**Purpose**

We recognize the possibility of incidents that involve chemicals spills that could occur on Company and/or Customer premises and shall take proper precautions in order to prevent and/or respond to such incidents.

**Scope**

All GIS Holdings, LLC Companies and affiliates including, Blanchard Industrial, LLC, GIS Engineering, LLC, Grand Isle Shipyard, LLC., GWIS, Mack Steel, NuWave, Valvemax, Discovery Industries, Inc., Global Inspections, LLC, and EIS, hereafter identified as “Company”.

**Procedure**

Chemical substances should be stored in proper containers to minimize the potential for a spill. Whenever possible, chemicals should be kept in closed containers and stored so they are not exposed to storm water.

A proper spill kit must be made available and contain the appropriate supplies for materials that may be spilled. Supplies must be easily accessible when required, and considerations must be made for both the type and quantity of materials. The contents of spill response kits shall be periodically assessed to ensure the availability of adequate spill response supplies and adjust inventory as necessary.

Areas where chemicals may be used or stored must be maintained using good housekeeping best management practices. This includes, but is not limited to, clean and organized storage, labeling, and secondary containment where necessary.

**Training**

Employees must be instructed on the proper response procedures for spilled materials. The training should include materials available for use, proper waste disposal, and communication procedures.

**Emergency Response**

The response of Emergency Personnel to chemical spill will depend on the circumstances that are involved. The type, amount, area of contamination, etc. in which a spill occur will vary and will take expert decisions on how the approached will be made. In all circumstances, when a spill discovered, protect yourself first. Get out of the area and contact your supervisor who will be trained in how to deal with such circumstances.

Supervisors shall make the appropriate predetermined calls in regards to such incidents. One call that shall be made immediately is the Corporate HSE Department via the Corporate Hotline, and shall be made without delay. Corporate HSE shall report the incident to the proper environmental authorities, including the type of chemical spilled and the quantity when required to do so.
