

Manual Section <b>7</b>	Issue Date 12/01/09	Revision Date 01/04/18	Policy Number LLCP-068
<b>Fall Rescue Addendum</b>			

As per Company and ANSI requirements, employees must be trained to provide prompt rescue in the event a fall occurs. This has been an issue that we has worked diligently on due to the amount of work we perform at height. We feel, that by having all personnel trained, we will be able to achieve a better response time in an unplanned emergency such as a fall. However, with that training comes a sense of responsibility. We have always trained our employees to rescue Company employees only due to liability issues with other Contractors not working through our Company.

Other Contractors on a Customer site must meet the same training requirement that our Company does. With that said, Company employees should minimize attempts to rescue an employee working for another Contractor unless requested by the Customer and appropriate documentation in recorded.

As of 2013, the Company will now allow their employees to fulfill rescue responsibilities for other Contractors if requested by the Customer; if the proper documentation is completed, and kept with all paperwork being sent in for that day.

The following document and a Company Fall Rescue Plan shall be filled out for requests from a Customer, to use Company Rescue equipment and personnel.

*This document is to be completed by individuals requesting rescue services from Company personnel.*
