

Putting People First Since 1948

Alert #: SA 8-17

Date: 6/3/17

OFFSHORE Work Execution

Recently we had a Near Miss occur that forced a GIS crew to use **STOP WORK AUTHORITY**. This safety alert serves as a reminder to make sure all the proper planning, permitting, and pre job inspections are complete **BEFORE** executing work.

Things to Remember Before Executing Work:

- A GIS supervisor and a Customer supervisor must always be present before work begins.
- Always follow Lock Out Tag Out procedures and ensure that LOTO has been verified before work begins.
- Before the job begins, always verify that the work pack matches the work permit you will be working from.
- Always be sure to adequately fill-out and USE your WPSEA.

***Report all incidents immediately to the GIS
Hotline 1-844-280-1991.***
