## MINIMUM REQUIREMENT

62

## WP/SEA MINIMUM REQUIREMENTS Pile Driving

|  | MEMORY JOGGERS  |
|--|---|
| Ensure that the following conditions are met before proceeding. If not met, address on WP/SEA. |   |
| $\triangleright$   | Communicate the "RIGHT TO STOP WORK AUTHORITY POLICY" and is exercised by all crewmembers and other   |
|  | personnel that believe something or some condition has changed. The job is to be stopped and accessed before proceeding.                        |
|  | The WP/SEA may need to be modified or a new WP/SEA maybe required before starting the work task again.  |
| $\triangleright$   | Verify that a Crane Lift Plan has been written.   |
| ۶  | Verify that Daily Crane Inspection has occurred; ENSURE ALL SAFETY FEATURES ARE OPERATIONAL. Keep in  |
|  | mind, safety features may fail during a lift without operator's knowledge.  |
| $\triangleright$   | Verify that all rigging connections are in compliance with GIS's rigging standards before starting.   |
| ۶  | Ensure that only authorized personnel are in the lift area.   |
| ۶  | Inspect certifications for crane operators and riggers and make sure that they are not expired.   |
| $\triangleright$   | Verify that signal person and valve person are informed on signal to be used.   |
| $\triangleright$   | Verify that lead and hammer are in the crane's radius capacity.   |
| $\triangleright$   | Inspect pile chain. (No excessive rust, cuts or breaks).  |
| $\triangleright$   | Ensure that pinch points and areas where personnel can become trapped or struck by pile are made aware of.                                      |
|  |   |
| 1  | MINIMUM REQUIREMENTS  |
| 1)   | Verify <b>All</b> conditions identified in the "Memory Joggers" section are met (or are not applicable); if <u>ANY</u> are not met, <u>STOP</u> |
| •  | and add the necessary step to the WP/SEA to ensure the safest method possible.  |
| 2)   | When tracking crane, secure boom and line before moving crane to desired location.  |
| 3)   | Erect lead to crane.  |
| 4)   | Ensure all causer keys and safety whips are in place.   |
| 5)   | Lower pile chain (verify that pile is rigged correctly) and connect to hammer.  |
| 6)   | Hoist hammer to top of lead.  |
| 7)   | Hoist pile and stab in hammer cap, making sure personnel are not in harm's way.   |
| 8)   | Hoist pile and hammer to a determined and safe height.  |
| 9)   | Stab pile and lead into place.  |
| ,  | Verify that all personnel are clear by waiting for OK from signal person.   |
| 11)  |   |
|  | Repeat Steps 5 through 10 until complete.   |
|  | If crane is to be moved, secure boom and line before tracking the crane.  |
| 1 4  | When job is complete, remove hammer and lead and transport crane to next location.  |
