AVOID COMPLACENCY!

DON'T LET ROUTINE BECOME RISK

The most dangerous task is often the one you've done a thousand times.

WHAT TO WATCH FOR:

- Skipping steps in a process
- Ignoring near misses
- Rushing through a task
- Not using PPE

HOW TO FIGHT COMPLACENCY:

- Do a mental safety check
- Stay alert to changes
- Call out shortcuts
- Every time could be the time something goes wrong.

**ROUTINE DOESN'T MAKE
A JOB SAFE—YOUR FOCUS
AND YOUR CHOICES DO.**

**SAFETY TAKES TIME,
SO TAKE THE TIME FOR SAFETY.**

Proper use of the GIS LIFE Processes helps to create a Fail-Safe Work Environment.
